Global Master Data Analyst – Internship (100%)

Lonza
the Place
to Go,
Stay and
Grow

Reference: R9509

September 2018 – February 2019 (or as it fits)

Your key accountabilities:

You will assume responsibilities in improvement, development of the Master Data management process and maintenance of the Master Data quality.

This will include:

- Data analysis and visualization,
- Mass changes and data migrations,
- Definition of specifications for process improvements and tests of new functions,
- Reports and queries for the team or the business.

Improving and enhancing training documentation as well as providing refresher trainings belong also to the accountabilities.

As a member of the Global Master Data team, you will be able to learn SAP Materials Management (MM) and Sales & Distribution (SD) modules, key business processes as well as data structures. Overall, you will interact with many different departments and experts across the company worldwide.

Our expectations:

- You have a Bachelor or Master degree in **computer or data science, mathematics, or informatics**.
- You have an understanding of data structures or experience with databases.
- You are fluent in English. German and any additional language will be an appreciated asset.
- You are interested in continuous improvements of processes, IT tools and innovative solutions.
- You are interested in being a reliable team member in a multi-cultural environment.

02.07.2018
